16 December 2025

To Whom It May Concern,

I am happy to recommend Chad Nestell, who completed my Technical Report Writing course (RPW 304) at Saginaw Valley State University in Fall 2025 with excellent results. This course focuses on producing technical and professional documents, including formal recommendation reports, white papers, and user manuals similar to those used in corporate and operational settings.

Over the course of the semester, Chad's writing was consistently strong. He paid careful attention to detail, exercised sound professional judgment, and organized his work in ways that made complex information easy to follow. His writing was clearly shaped by audience needs rather than academic convention alone. His final technical report and user manual, in particular, stood out as polished, practical pieces of documentation that would transfer easily to a workplace environment with minimal revision.

Just as important, Chad approached the course with a level of reliability and professionalism that is rare at the undergraduate level. In addition to meeting deadlines consistently, he considered feedback thoughtfully and applied it effectively in revisions. He also set a strong example for his peers by maintaining high standards for himself and staying engaged throughout the semester. It was clear that he viewed the course as an opportunity to strengthen skills he actively uses in his professional work.

Because I reviewed Chad's writing in depth across multiple major assignments this semester, I can confidently speak to his ability to produce clear and purposeful documentation. He is well prepared for roles that require strong written communication, analytical thinking, and dependable follow-through.

I believe Chad would be a strong addition to any organization that values clear communication and professionalism. Please feel free to contact me if you would like additional context or detail.

Sincerely,
Kylie Wojciechowski Julian
